

M and Congestion Management Program (CMP) requirements.

The Growth Management Element is the most current expression of the City of Villa Park's growth management policies. Consequently, although there is a certain amount of overlap among the General Plan elements, the Growth Management element is the key resource document for growth management concerns.

The Growth Management Element achieves its consistency with other General Plan elements through the pursuit of common major goals such as traffic level of service and public facilities development. Consistency of Growth Management Element implementation with specific elements is described below:

1. The maps contained in the Land Use, Circulation, and Open Space and Conservation Elements shall provide General Plan policy guidance for implementing public facilities planning.
2. Major City of Villa Park public facilities shall conform to the adopted Noise and Seismic and Safety elements.
3. Innovative financing, funding and implementation programs which could serve to minimize infrastructure costs, and thus housing costs, are in the Housing Element.
4.
  - a. Regional transportation facilities are mapped in the Circulation Element.
  - b. Regional public facilities (excluding transportation) are mapped, to the extent feasible, in the Land Use Element.
  - c. Community facilities are mapped in the Land Use Element.
5. The Circulation Element (e.g. Master Plan of Arterial Highways) is the City of Villa Park master plan for transportation, and provides general policy and program guidance for facility planning and siting.
