

3. Housing Element — identifies existing and projected housing needs and establishes goals, objectives and programs for the preservation, improvement, and development of housing to meet the needs of all economic segments of the community.
4. Conservation Element — provides for the conservation, development, and use of natural resources, such as water, forests, soils, rivers, lakes, harbours, fisheries, wildlife, and minerals.
5. Open Space Element — details plans and measures for the preservation of open space for natural resources, for the managed production of resources, for outdoor recreation, and for public health and safety.
6. Noise Element — examines noise sources, yielding information to be used in setting land use policies for compatible uses and for developing and enforcing a local noise ordinance.
7. Safety Element — establishes standards and plans for the protection of the community from flood, geologic and seismic hazards.
8. Growth Management Element — mandates that growth and development be based on the City's ability to provide an adequate traffic circulation system and related public facilities.

CURRENT VILLA PARK GENERAL PLAN

The City's General Plan was last updated in 1986. Since that plan does not fulfill all current requirements of State planning law, the City Council determined that a comprehensive revision should be initiated. It is the intent of the 1990 General Plan revision to achieve the following objectives:

- Update the data contained in the previously adopted elements.
- Establish internal consistency among all elements of the General Plan.
- Revise goals and policies as needed to reflect changing conditions.
