

DO YOUR PART TO SAVE WATER DURING THE DROUGHT.

For a limited time, you can get a **FREE** survey of your home's water use through the **Water Smart Home Program**. Your custom survey includes an evaluation of your home's outdoor (and indoor, if desired) water use with accompanying water-saving recommendations.

Your custom report will provide recommendations on money-saving rebates and no-cost changes that can reduce your home's daily water use.

GET SMART ABOUT WATERING!

SMART IRRIGATION TIMERS: These “smart” timers use information about your landscape and local weather conditions to automatically adjust your watering schedule

Rebate level: Up to **\$380** per controller for properties less than 1 acre, or \$35 per station for properties over 1 acre

ROTATING SPRINKLER NOZZLES: Replace traditional pop-up spray heads with rotating sprinkler nozzles, which water more evenly and efficiently

Rebate level: Up to **\$4** per nozzle

SOIL MOISTURE SENSORS: Installed in plant root zones, they tell your sprinklers when watering is needed and for how long

Rebate level: Up to **\$380** per controller for properties less than 1 acre, or \$35 per station for properties over 1 acre
